

PORT OF KLICKITAT

For Immediate Release

January 10, 2022

Boat Ramp and Parking Lot Improvements

The Port of Klickitat is pleased to announce its plans to make improvements to the parking area and repair the boat ramp.

The parking lot project will consist of pulverizing the existing asphalt and grading the gravel mixture. This mixture will become the base for future pavement, as the Port continues to seek funding to complete the long journey towards a paved parking area. The Marina Parking Lot is estimated to be closed from Monday, January 17th to Friday, January 21st.

The eastern side of the boat ramp has become undercut leaving a void space that requires filling and stabilization. While this may result in some temporary closures to the east side boat ramp, the west ramp will be available. Note there is a large rock at the end of the ramp when water is low. This repair will ensure the boat ramp remains serviceable for many years to come. The East Boat Ramp will be closed for repair from Monday, January 24th to Tuesday, February 8th.

The specifics of the closures are subject to change. If you would like to learn more about the projects please call the Port Office at 509-493-1655.
